EDUCATION

MCA — RGPV University

2025 | CGPA: 8.42

BCA — LNCT University

2023 | CGPA: 8.50

TECHNICAL SKILLS

Languages

- JavaScript (ES6+)

Frontend

- React.js
- HTML5 / CSS3
- Tailwind CSS
- Framer Motion

Backend

- Node.js
- Express.js
- REST APIs

Database

- MongoDB

Tools

- Git / GitHub
- Postman
- JSON

CORE STRENGTHS

- MERN Stack Architecture
- AI Application Dev
- Real-Time Systems
- Workflow Automation
- Problem Solving
- Rapid Learning
- Team Collaboration

Results-driven Full Stack Developer specializing in MERN Stack, real-time applications, AI integration, and enterprise automation. Proven track record of architecting production-ready platforms that solve complex business challenges. Combines Generative AI, OCR, Socket.IO, and Playwright to deliver scalable, intelligent web applications. Strong software architecture understanding with an ownership mindset and passion for emerging technologies.

WORK EXPERIENCE

IT Coordinator

[Company Name] | India | [Start – End]

- Coordinated IT operations, software implementation, and ERP system maintenance to support organizational productivity.
- Championed process automation initiatives, identifying workflow bottlenecks and delivering technology-driven solutions.
- Provided technical support for software, hardware, and ERP issues; collaborated cross-functionally to improve operational efficiency.
- Assisted in deployment of business automation workflows, reducing manual data processing overhead.

FEATURED PROJECTS

IT Support Management System — [MERN Stack](#) · [Socket.IO](#)

- Architected a centralized ERP support platform covering vendor creation, machinery registration, item management, and issue tracking.
- Enabled real-time bidirectional communication using Socket.IO, improving team responsiveness and request visibility.

AI-Powered Resume Analyzer — [MERN Stack](#) · [Generative AI](#) · [OCR](#)

- Developed an AI-driven platform using Generative AI to calculate job-match scores, surface skill gaps, and recommend role alignments.
- Integrated OCR for automated resume data extraction; delivered personalized optimization insights to end users.

ERP Data Entry Automation Tool — [MERN Stack](#) · [Playwright](#)

- Automated ERP vendor and item data entry using Playwright browser automation driven by Google Sheets, eliminating manual effort.
- Improved data accuracy and enterprise workflow efficiency through streamlined automated data pipelines.

Real-Time Location Tracking System — [MERN Stack](#) · [Socket.IO](#) · [Leaflet](#)

- Built a collaborative location-sharing platform with room-based tracking for multiple concurrent users and live Leaflet map integration.

Corporate Portfolio Website — [React.js](#) · [Framer Motion](#)

- Delivered a responsive, performance-optimized corporate website with Framer Motion animations and mobile-first design.

KEY ACHIEVEMENTS

- Delivered 5+ production-ready applications addressing real enterprise and business challenges end-to-end.
- Successfully combined Generative AI + OCR into a practical recruitment tool, demonstrating applied AI development skills.
- Automated repetitive ERP operations, contributing directly to operational efficiency and reduced manual error rates.
- Maintained strong academic performance: MCA 8.42 CGPA and BCA 8.50 CGPA across 5 years of study.
